Subject: Re: Clashing identifiers?

Got it, so maybe they are the same rat, but in case it's helpful, here are the full directory names, which include the scan dates:

20171018_BIOS_1038_5mo.K01
20180831_BIOS_1038_5mo.P81

and

20171020_BIOS_1043_5mo.K21
20180831_BIOS_1043_5mo.P81

I'll check tomorrow. But as a rule of thumb, don't care about the cohort folders (C1 , C3), only the file name matters:
date_ratID_timepoint C1, C2, C3 folders were just tools for me to divide the dataset into nice-batches-to-compress-and-upload , and I have propably just copied the same rats twice

Subject: Clashing identifiers?

Hi Riikka,

Just wanted to check about something I noticed in processing the C3 data from the 5mo timepoint. It looks like these two cases have 5mo MRI in both cohort C1 and C3: 1038, 1043.

Does that make sense? They seem to have different scan dates, so it seems like they are likely different rats. If so, is there a correction to make with the ids?

best,
Ryan
