

## **MULTIPLE PI LEADERSHIP PLAN – PROJECT 3 – BIOMARKERS OF HUMAN EPILEPTOGENESIS AFTER TRAUMATIC BRAIN INJURY**

Dr. Vespa will be sole Principal Investigator of Research Project 3 on studies of epileptogenesis using patients with TBI/PTE, in careful continuous coordination with the entire Project leadership team through membership on its Executive Committee (see Overall documentation). He will serve as the lead investigator for purposes of human studies across all collaborating clinical sites; local investigators at the collaborating sites will serve as local PI's.
